

Understanding MS Excel – Intermediate

– 2 Days –

MS Excel is a powerful business tool that should be used by every person in an organisation to store, analyse and present data in order to make better business and managerial decisions. Most people don't even scratch the surface of the use of MS Excel. This course ensures you become more productive and self-reliant by mastering the world's most popular productivity tool!

We have 3 modules which will grow your knowledge of the programme exponentially, introducing you to new ways of using the programme and teaching you the skills needed to organise, calculate, evaluate and find data quickly and efficiently. You will cover correct ways to set up and link spreadsheets and discover how to use "built" in specialist capabilities such as Macros, Data Analyses and Data Validation tools that we all know exist, but don't really know how to effectively use. We guarantee that if you attend this programme, you will go back and redesign your spreadsheets, making them more efficient and effective as a business tool to support your role in the organisation, allowing you to do more in less time, with Excel, than you ever have in the past.

The three individual courses will help you to unlock the full potential of one of the most powerful business tools at your disposal - helping you to stand out from your colleagues, improving the quality of your analysis and decisions and assisting in your own professional development.

What can you expect to learn ? :-

Understanding Excel and Shortcuts

- Recapping some of the important MS Excel Skills needed to capture and prepare your data correctly for more advanced analysis
- Learning to design high-quality spreadsheets with data laid out and listed intelligently and usefully
